NSP
naturally soft pad

NSP pads passed
the dermatological test
carried out by UNIRED
(University of Padova)

La rivoluzionaria placchetta “NSP”, nasce dopo anni di ricerca e test su materiali alternativi al PVC effettuati presso i laboratori R&D Da Via Luigi. L’elastomero con cui è prodotta, rappresenta una validissima alternativa al PVC migliorandone però alcune caratteristiche: infatti offre una sensazione simile a quella del silicone a livello di morbidezza e comfort offrendo però trasparenza e durata nel tempo finora sconosciute.

“NSP” non contiene ftalati, è 100% riciclabile e assolutamente biocompatibile. Soddisfa i requisiti delle seguenti normative:

- 2006/1907/CE (REACH)
- PROPOSITION 65 della California
- ASSENZA Bisfenolo-A CAS nr. 80-05-7
- Idoneità al contatto con alimenti (regolamento (UE) nr. 10/2011)

L’elastomero ha inoltre superato i seguenti test:

- AWT-ASTM:G 154-12°, 96 ore
- ISO10993-5:2009 ISO10993-12:2012
- ISO10993-10:2012 ISO10993-12:2012
- ISO12870 clausola 4.7 , resistenza al sudore
- ISO12870 clausola 4.9 , resistenza all’accensione
- ISO12870 clausola 4.10 , resistenza alla radiazione ottica

The revolutionary “NSP” nose pad is the result of years of research, innovation and through testing on PVC-free materials at Da Vià Luigi srl R&D labs. This innovative elastomer is a great alternative to PVC and it outperforms this well-known plastic in several areas. In fact NSP combines the soft feel and comfort typical of silicone pads with the transparency and durability associated with PVC products.

“NSP” is phthalates-free, 100% recyclable and 100% biocompatible, is compliant with the following regulations:

- 2006/1907 / EC (REACH)
- PROPOSITION 65 of California
- ABSENCE Bisphenol-A CAS nr. 80-05-7
- Suitability for food contact (Regulation (EU) No. 10/2011)

Has successfully passed the following test:

- AWT-ASTM:G 154-12°, 96 hours
- ISO10993-5:2009 ISO10993-12:2012
- ISO10993-10:2012 ISO10993-12:2012
- ISO12870 clause 4.7 , resistance to perspiration
- ISO12870 clause 4.9 , resistance to ignition
- ISO12870 clause 4.10 , resistance to optical radiation
